

Assessment Content Partner for IT Roles

Who We Are

We specialize in designing and delivering high-quality assessment content for IT roles across 14 programming languages and technical domains. Our content is created by domain experts actively working in the field and validated by a second expert—ensuring real-world relevance, accuracy, and defensibility.

What We Offer

- **Test Blueprinting**
Role-specific structure, topic weightage, difficulty levels
 - **Item Writing**
 - Multiple-choice questions (MCQs)
 - Debugging tasks
 - Case study-based scenarios
 - Hands-on practical assessments
 - Hackathon-style problem sets
 - Code interpretation and logic puzzles
 - **Answer Key Development**
Clear logic, explanations, and scoring rubrics
 - **Peer Validation**
Every item reviewed by a second expert for fairness and accuracy
 - **Audit-Ready Documentation**
Full traceability from blueprint to final delivery
-

Why Partner With Us

Feature	Benefit
Practitioner-Led Creation	Content reflects current tools, tasks, and job expectations
Peer Review Process	Ensures accuracy, fairness, and defensibility
Advanced Question Formats	Debugging, hands-on, hackathon, case-based—beyond basic MCQs
Scalable Delivery	Hundreds of questions per month across IT domains
White-Label Ready	Seamless integration into your platform or client workflow
Trusted by Leaders	Mercer, TCS iON, and other top assessment providers

Coverage Areas

- Programming Languages: C, C++, Java, Python, JavaScript, PHP, Ruby, Go, Kotlin, Swift, R, SQL, Shell, TypeScript
- IT Roles: Full Stack Developer, Backend Engineer, QA Tester, DevOps, Data Analyst, Cloud Engineer, and more

Let's Collaborate

Whether you're scaling your assessment platform or validating internal training, we deliver content that's credible, scalable, and built for impact.
